

OFFSITE CONSTRUCTION EXPO

DISCOVER OFFSITE

September 23 & 24, 2015

Walter E. Washington Convention Center,
Washington D.C.

www.offsiteconstructionexpo.com

WHY ATTEND?

According to a survey conducted by the National Institute for Building Science's Offsite Construction Council, 93% in the architect, engineer, contractor, & owner/developer fields indicated that they had implemented some form of offsite construction process in the past twelve months. The main reasons cited for using offsite construction were:

- Schedule advantage/speed to market
- Quality control
- Cost effectiveness

This event will feature exhibits from manufacturers, contractors, design professionals, and consultants specializing in prefab and offsite construction processes. Additionally, eight case studies will be presented throughout the event.

WHO SHOULD ATTEND:

This event is free for any architect, owner, developer, engineer, contractor, procurement officials, or policymaker wanting to network with providers of offsite construction systems.

Offsite systems and processes are ideal for the following markets:

- Healthcare
- Multi-family/Commercial Housing
- Publicly funded projects: schools, barracks, medical clinics, administrative buildings
- Quick service restaurants/franchisees

Event brought to you by:
